VT-315 / VT-315I

DC TIG/MMA WELDING MACHINE WITH PULSE / 220V

VT-315 and VT-315I are Portable, Single phase 220V (VT-315) and three phase 380V (VT-315I), fan-cooled inverter welding machine for TIG welding in direct current (DC) with full pulse function and stick (MMA). Possibility of HF or lift striking. Extremely flexible use for welding materials such as: steel iron titanium stainless steel copper cast iron etc.

SPECIFICATION

TECHNICAL CHARACTERISTICS	VT-315	VT-315I
MAIN VOLTAGE (V)	220,1P	380,3P
FREQUENCY (Hz)	50-60	50-60
RATED INPUT CAPACITY (KVA)	13	13
NO-LOAD VOLTAGE (V)	59	56
INSULATION CLASS	H	H
OUTPUT-CURRENT (A)	10-315	10-315
DUTY CYCLE (%)	60	60
WEIGHT (KG.)	27	31
DIMENSION (WxLxH)	610x360x550	610x360x550
PRICE	CALL	CALL

CONSUMABLE

- WELDING TORCH COMPLETE WITH TORCH HEAD
- SOLAR AUTO WELDING HELMET
- ARGON REGULATOR
- GROUND CLAMP 300A W/CABLE 3M.
- ACCESSORIES FOR TORCH HEAD
- WELDING GLOVE

FEATURE :

- Inverter technique makes the welder more strong to work with best welding effect. Machine runs in high utilization rate of power.
- With Full Pulse function, Pulse current with more quick fall speed, much smaller wave value current and it's can weld both thin and thick parts perfectly. Adjust Pulse control, can be used for automatic welding.
- Adopt touch arc introduce technology, free disturb of magnet, compliance with EMC standard.
- Most advance electric circuit design to make sure it work with best infiltrating ability. Inverter technique make sure the welder work in high efficiency. Suitable for TIG and Stick/MMA arc welding, easy to operate.
- Warning LED with thermostatic, over voltage, overcurrent protection.
- Compact,light,high efficiency, safety, portable.
- Professionally for welding of kitchen equipment, the molds repairment, Auto parts,Furniture, Automotive,Foods Industrial,Construction,specially suitable for the welding to bike.
