

JG-016 Wavering Auto Welding Carriage เครื่องช่วยเชื่อมอัตโนมัติ

- Used for the auto-welding of jointing, vertical and horizontal
- Widely use in shipbuilding, bridge, vehicle oil & chemical and steel structure engineering.
- Welding touch has wavering function. Waving speed, angle, central shifting and left/right pause time can be adjusted so as to make the best welding result.
- The driven is equipped with manual clutch for easy position and returning to the starting position of the welding.
- Small rail is easy to move and equipped with permanent magnet, easy to operate.
- Wavering mode : —     

Model	JG-016
Input	220V/50-60Hz
Up Down	40mm
Torch Forward Backward	40mm
Torch Work Angle	± 45°
Torch Processing Angle	10°
Weaving Control left/right pause time	0-2.5s
Weaving Speed	0-100
Weaving Control Shifting distance set	0-±8°
Weaving Angle	±15°
Length Speed mm/min	30-900
Dimension	L480xW250xH400mm
